

BENZODIAZEPINES

Side effects;

Convulsions, confusion, coma, insomnia, tremors, sweats, anxiety, delusions, violent outbursts, death

SLANG TERMS

BLUES, NORRIES, TAMAZIES, VALLIES, BENZO'S, MOGGIE'S

Related risks;

Unplanned pregnancies
Violent attacks (by you or towards you)
Rape (by you or towards you)
Contracting an STI
Future serious mental health issues
Criminal record

Are the risks associated with taking benzodiazepines worth the high?

No, not only are you putting yourself in danger of all the risks you probably won't even remember the night before!
These drugs, even when used in the correct way by a doctor, have serious side effects.

**They control your brain cells
The only thing controlling your mind should be YOU!!**
